

Evaluation Paper Assignment #3

Following your Final Group Project each person will write an individual paper copy. Papers will be due the class following your final presentation. Papers should be 4-5 pages long. There will be three outside resources cited in the text of the paper and included in the Reference page.

Topics in the paper will be a reflection of the group process. Topics may include the following:

1. If there was one group in the class that deserved an “A” grade other than your group, which one would you choose. Discuss what that particular group did to make them receive an “A”
2. Evaluate the participation level of each person in your group. What did each person do to contribute to the success of the group project? What could each person have improved on the process to better the group project?
3. What ideas did you have planned for your presentation that worked especially well?
4. What areas did not work as well that you could improve on in your next group process?
5. Thinking about what we learned in class on the group project, how did that impact your outcome of the project?
